DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The disclosure is objected to because of the following informalities: On page 4, lines 4-21, there is no numeral "4" in Figure 14. All references to the claims on pages 5-8 should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1732

In claim 8, step (f), "the sintered block removed the excess portion" is confusing and unclear (there appear to be one or more words missing).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1732

8. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abe et al (U.S. Patent 6,657,155 B2).

Abe et al (see the entire document, in particular, col. 1, lines 10-31; col. 4, line 65 to col. 8, line 56) teach a process of making a three-dimensional object as set forth in the instant claims, except that Abe et al do not explicitly teach repeating the step of removing an excess portion, which would have been obvious to one of ordinary skill in the art at the time the invention was made in view of Abe et al principally in order to remove an excess portion during formation of the layers by repeating the steps of forming a powder layer and irradiating the powder layer (col. 6, lines 37-48).

9. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jamalabad et al (U.S. Patent 6,682,684 B1).

Jamalabad et al (see the entire document, in particular, col. 6, line 61 to col. 7, line 4; col. 7, line 34 to col. 8, line 44) teach a process of making a three-dimensional object as set forth in the instant claims, except that Abe et al do not explicitly teach repeating the step of removing an excess portion, which would have been obvious to one of ordinary skill in the art at the time the invention was made in view of Abe et al principally in order to remove an excess portion during

Art Unit: 1732

formation of the layers by repeating the steps of forming a powder layer and irradiating the powder layer.

Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-15 of U.S. Patent No. 6,657,155 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because repeating the step of removing an excess portion would have been obvious to one of ordinary skill in the art at the time the invention was made in view of claims 2-15 of U.S. Patent 6,657,155 B2 principally in order to remove an excess portion during formation of the layers

Art Unit: 1732

by repeating the steps of forming a powder layer and irradiating the powder layer.
